Updated May 12, 2011

Note: The products listed above have been used in conjunction with EFS-Web filings and have no known compatibility issues.

SUPPORTED BROWSERS

The USPTO actively tests and supports Internet Explorer 6, Firefox 2, and Safari 2 for use with EFS-Web. However, each browser version (major and minor releases) may have specific issues that USPTO cannot always address. If you install a later browser version, please be sure to maintain one of the supported browsers in order to ensure access to EFS-Web.

PORTABLE DOCUMENT FORMAT (PDF) INSTRUCTIONS

PDF Specification

EFS-Web requires the PDF file to conform to any one of versions 1.1 through 1.6 of the PDF specification.

PDF Creation Software Compatibility

The most common versions of PDF Writer software that are compatible with EFS-Web include:

- Adobe Acrobat Professional
- ABXPDF Writer (Freeware)
- Open Office (Freeware)
- Easy Office (Ad ware)
- CutePDF Writer (Freeware)
- PDF Redirect (Freeware)
- PDF 995 (Ad ware)
- Primo PDF (Freeware)

PDF creation software products that are not listed above may not be compatible with EFS-Web and their use may result in document image degradation and/or processing delays.

Adobe Reader Compatibility

EFS-Web does not require the use of Adobe Reader, a free software application. However, to use the EFS-Web eForms, Adobe Reader or Acrobat supported versions are required. To upgrade to the Adobe Reader or Acrobat software version visit the Adobe website, choose the appropriate operating system and language for downloading the latest version.

SECURITY

Please ensure that the following settings are applied to your computer and/or network. NOTE: You may need Administrative rights to adjust some of these settings.

All Users

- Networks and Firewall infrastructures must allow outbound communication to USPTO via port 443/https.
- Networks and Firewall infrastructures must not strip packet header contents.
- Workstations must run a supported Operating System version.
- Workstations must run a supported browser.
- Browsers are strongly recommended to be configured for using TLS instead of SSL.
- Browsers must support HTML frames.
- Browsers/workstations must accept cookies, at least for the length of a particular communications session.

Registered Users

 Browsers/workstations must accept Entrust security applets, for download and use, at least for the length of a particular communications session. Workstations must run a supported Java Runtime Environment/Java Virtual Machine (JRE/JVM).

Unregistered Users

• Users must set browsers to permit running of JavaScript.

Cookie and Java Configuration Details

A "session cookie" is information sent by a web site server to your computer while you are connected to that site. Session cookies expire once all browser windows are closed. EFS-Web's cookies temporarily store information about your interactions that may be needed later for the system to perform a function. As you move from page to page in EFS-Web, cookies allow your specific Name, Documents, Fees, etc. to be retrieved. No persistent cookies are used.

Updated May 12, 2011

The following table details the settings that are needed, in various browser environments, for cookie handling and certain Java related items.

| Browser | Setting Name | Setting | |
|----------------|--|-------------------------------|--|
| Microsoft IE 6 | Warn me before accepting a cookie | Disable | |
| Wheresore IE o | First part Cookies | Accept or Prompt (see Note 2) | |
| (See Note 1) | Allow per-session cookies (not stored) | Enable or Prompt | |
| | Active Scripting | Enable or Prompt | |
| | Scripting of Java Applets | Enable or Prompt | |
| | Third Party Cookies | Accept or Prompt (see Note 2) | |
| Firefox 2 | Enable Java | Enable | |
| THETOX 2 | Enable JavaScript | Enable | |
| | Cookies | Accept all Cookies | |
| Safari 2 | Enable Java | Enable | |
| Juluii 2 | Enable JavaScript | Enable | |
| | Enable Cookies | Always | |

Notes:

- 1. The IE 6.0 Browser Privacy setting cannot be set to 'Block All Cookies'
- 2. Applies only if using the 'Override Automatic Cookie Handling' setting
